Instructions regarding the Projects:

1. All projects will have 5 tasks:
   a. Data collection
   b. Data Preprocessing and Cleaning
   c. Data Visualization
   d. Data Statistics(Summary of statistics)
   e. Hypothesis Testing
   f. Prediction Task(Using Machine Learning Model)
2. Every group has to submit their work up to "e. Hypothesis Testing" before mid sem and complete work till the end sem.
3. Every group will have to create a slide and a video and upload it to youtube in which each member of the respective group has to present his/her contribution.
   a. Deliverables for Mid Sem:
      i. Video length: 10min.
      ii. A Summary pdf
      iii. The slides used during the presentation
   b. Deliverables for End Sem:
      i. Video length: 15 min.
      ii. Final Report and slides
   c. There are no limits on the number of slides, but each teammate has to present his/her part.
   d. Make sure that during the video recording, your face is clearly visible along with the slide you are presenting. (Just text with audio will not be accepted.)
4. Any kind of interesting facts about data(e.g., kind of different studies which can be done using the collected data), innovative ideas, and/or research ideas (Manipulation or enhancements of existing techniques for better results) will also be considered during evaluation and will be highly appreciated.
5. In case of any discrepancy, please discuss with your allotted TA.
